

Innovation to the best...

An ISO 9001:2008 Company

Total Energy Saving Solutions

**Solar Energy Solutions**

Sunpro+ solar Energy based products are manufacturing and Supplying of high class solar products as per the international values and norms, we are using high quality raw material and are available in the markets at competitive prices. Our range of products known all across the world for its easy operation and high efficiency, Easy Installations, Eco-friendly Products.

Solar Hybrid Inverter / PCU (400VA - 7.5KVA)**Solar Water Pumping System (1KW - 10KW)****ON / OFF Grid Solar Power Plant (1KVA - 50KVA)****Solar Street Lights (12W - 48W)****Solar MPPT / PWM Chargers (12V - 96V / 100A)****Solar Home Lighting Systems (3W - 12W)****Solar Water Heater (ETC / FTC)****Solar Panels and Batteries****Renewable energy****For a powerful future**

Water Tank Overflow Control Solutions

Aquapro+ Automatic wireless Water Level controller are manufacturing and designed to automatic control of motor, which ensures constant reserve of water in storage tanks. Our Products are used to automatically filling overhead tank. Fill the overhead tank as and when it gets empty and monitors the water level. And No extra wiring is needed to be done from the O.H tank sensors towards the control unit.

Wireless Water Level Controller - Domestic Model

Wireless Water Level Controller - Commercial

Wireless Water Level Controller - Industrial Model

Water Level Controller Indicators - Domestic Model

Solenoid Water Level Controller - Industrial Model

Water Level Indicators (Commercial / Industrial)

IR Remote Control / Timer and Programmer

RO Water Purifier / Softner

Save Water Secure the future **When you conserve water, you conserve life**

Save Water Save Time Save Money

Lumipro+

LED Lighting Solutions

Lumipro+ LED Lights manufacturing and Supplying of 3 watts to 150 watts LED Products, and all the LED Products are Universal Standard Input Range Designed the Products. The latest technology is forever used for new products development and integrated, allowing the drawbacks of the predictable lighting systems. The environmental problems caused by them like "GLOBAL WARMING" and the need for "ENERGY SAVING" techniques.

Indoor Lights (6W - 24W)**Street Lights (6W - 100W)****Flood Light (12W - 48W)****Industrial Bay Light (50W - 150W)****LED AC / DC Drivers (3W - 150W)****DC LED Lights (3W - 24W)****D-FX**[®]**Innovation to the best...**
